Connecting to the Wireless Network on Campus

Saint Mary's University provides wireless internet access to all Faculty, Staff, Students and all Guests of the University. Please follow the instructions below to connect to our network.

All computers are required to be up to date with all security definitions (Windows Updates / Apple Security Updates) and be running current anti-virus software.

For more information on acceptable anti-virus software, [click here](#).

On campus users will be able to connect to two University wireless networks:

SMUMN-Secure

This network is the standard network that ALL students, faculty and staff of the University should be connecting to. It is the most secure and will provide 24/7 access to the SMUMN resources.

This is the only Wireless network that students will be able to use in the Residence Halls.

SMUMN-Open

This network is for guests of the university and for students to register their gaming devices, smart TVs etc.

Please note that connections to this network will expire after 8hrs. Guest Users may re-log in after expiration

Click here for [Guest Registration instructions](#)

Click here for [Connect Smart TVs/Apple TV/Roku/Game Console... etc](#)

Connecting to SMUMN-Secure (Students, Faculty & Staff)

First, connect to the SMUMN-Secure wireless network.

Log in to the network using your SMUMN Username and Password.

ResHall Information

At this point all mobile devices will be successfully connected.

If you are using a computer to connect to the network, please open an internet browser. It should open this page:

SMUMN-Secure Health Check!

Your client does not meet the minimum security requirements.

[Download the health check scanning agent.](#)

If you have already downloaded the agent, please update your antivirus program and conduct a virus scan to connect.

ResHall Information

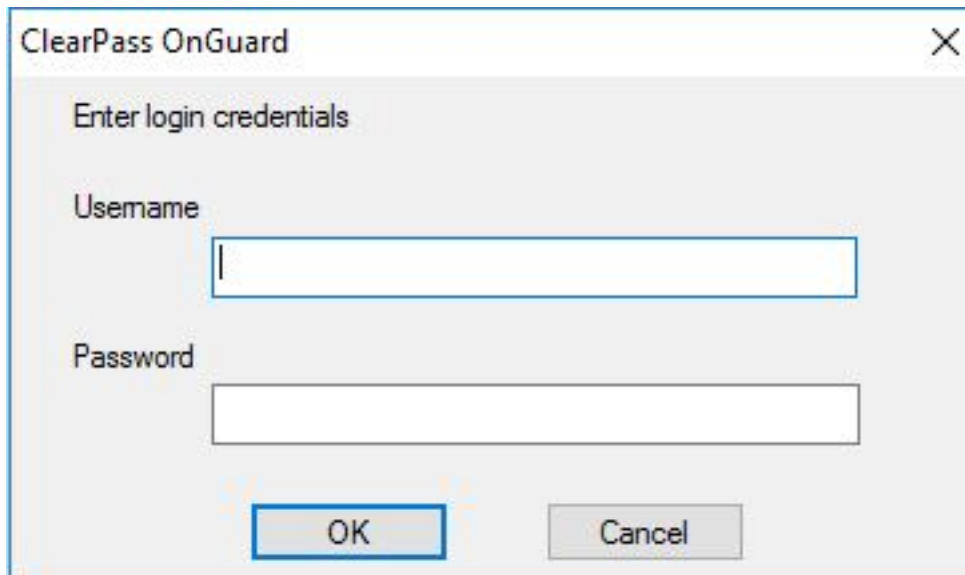

Please click "Download the health check scanning agent"

Run the application after it downloads and follow the installation instructions.

ResHall Information

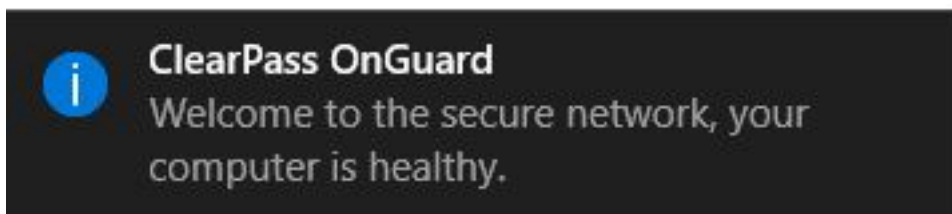

Make sure the "Run Clearpass" box is checked before you click finish. This will scan your computer to make sure it is safe to connect to the network.

Login again with your SMUMN Username and Password

A screenshot of the ClearPass OnGuard login dialog box. The window title is "ClearPass OnGuard" with a close button (X) in the top right corner. The main text inside the dialog is "Enter login credentials". Below this, there are two input fields: "Username" and "Password". The "Username" field is currently empty and has a blue border. The "Password" field is also empty. At the bottom of the dialog, there are two buttons: "OK" and "Cancel".

If your computer passes, this message will pop up (on Windows):

If your computer does not pass the health check, please run Windows/Apple Updates and check your Anti-Virus software for updates and try again.

You have now successfully connected to the SMUMN-Secure Network.
