

# Blackboard for Students

## Students: Can't find course in Blackboard?

Courses not showing up in Blackboard?

Three things could be happening:

- 1) Check and make sure your courses are displayed. Login to Blackboard. Find the "My Courses" Box. Click on the pencil icon in the upper right corner of the box. Select "display course name" for any enrolled courses.
- 2) If your courses are NOT listed in there, that means that your instructor has not made them available to you. Please contact the instructor(s) and ask them to make the courses available.
- 3) You have not officially registered for the course in WebTools or via your Program Coordinator. Please verify your enrollment in WebTools, Check Current Winona or MPLS Schedule. Select appropriate Term ID. You can also click Course Registration.

Unique solution ID: #1108
